EXPERIENCE

Nillion | Developer Relation Engineer, Content Manager

Remote | April - Present

- Led developer education and technical storytelling for Nillions privacy stack, including nilDB (private storage), nilAI (private inference), nilCC (confidential compute), and SecretVaults, translating complex cryptography concepts into accessible content for Web2 and Web3 developers.
- Designed and shipped end-to-end POCs and demo applications (expense trackers, password managers, AI agents, privacy-preserving dashboards) showcasing real-world use cases of privacy-first infrastructure.
- Built and maintained nil-auth, an open-source Ethereum authentication SDK for nilDB, reducing developer friction around private data access and enabling faster prototyping of privacy-first applications.
- Partnered closely with product and engineering teams to relay developer feedback, improve SDK ergonomics, and refine onboarding flows based on hands-on usage and community insights.
- Represented Nillion at conferences, workshops, and ecosystem events, delivering live demos and technical talks to developers, founders, and enterprise audiences.

Fleek | Developer Advocate

Remote | March 2024 - Feb 2025

- Produced technical content across diverse modalities, including video walkthroughs, written guides, POC demos, and live streams. Focused on demystifying Fleeks SDK and technologies, particularly JavaScript/TypeScript, to make them accessible to newcomers and improve the developer experience.
- Fixed and revised broken tutorials, ensuring accurate, up-to-date resources for developers while enhancing onboarding and usability.
- Developed tutorials integrating AI tools and frameworks like BrianKnows, & Eliza amongst others, emphasizing their application in Web3 and decentralized technologies.
- Provided direct technical support to developers, actively engaged with community members, and represented Fleek at conferences, workshops, and events.
- Authored and maintained technical documentation, streamlining onboarding and empowering developers to maximize their use of Fleeks platform.

Developer DAO | Developer Relations Engineer (DevRel)

Remote | Oct 2022 - March 2024

- Collaborated with the DAO's leadership team to define and communicate the organization's developer-focused mission and vision.
- Worked collaboratively with internal team members to create engaging and compelling content that achieved desired results.
- Championed diversity and inclusivity in the developer community, advocating for underrepresented groups and organizing initiatives to support their growth and participation.
- Collaborated with Marketing and PR teams to create targeted campaigns and content that showcased the organization's commitment to developers and their success.

SKILLS

Programming Languages: Typescript, Solidity, HTML/CSS, Python, Javascript, PHP

Libraries/Frameworks: ReactJS, NextJS, web3js, EtherJS, NodeJs

PROJECTS / OPEN-SOURCE

Dev Youtube Channel | Link

Final Cut Pro X, Figma, VSCODE

This YouTube channel is committed to producing developer-friendly technical content with the aim of helping developers expand their skills and knowledge.

Nil-auth | Link

typescript, NPM

Ethereum wallet authentication for Nillion SecretVault.
